Projects

HEALTHCARE PHARMA PAYMENT APPLICATION
In this project we created a web application for HealthCare shops, wherein the admin (shop owner) can manage all the data of medicines available in the store. Also, he can resolve any issues faced by the customers using the web application. The customers can search for any medicine in the store database and can place orders for medicines and make payment for the same. Also, a customer can track the status of the order. Key Skills: MySQL, Java, Spring Boot, HTML, JSP, CSS, Bootstrap

Activities

• Tesla Event Organizer- Junkyard Wars(College level event) • Gym • Travel
